2 Docking Position

- See system requirements for pool size and dimensions in the MYLO website.
- The camera line of sight must cover the entire pool area (the camera has a field of view of 110°).
- The docking station mounting screws should be anchored.
- The pool water level should reach at least the minimum mark on the underwater tube once it is inserted into the pool.

For more information visit our website **www.coralsmartpool.com/mylo ,** and refer to the full user manual.
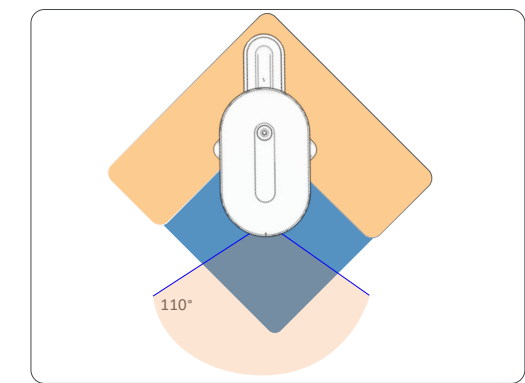

3 MYLO Orientation

Select one of the following mounting orientations:

A. Center of the narrow side of an elliptic pool.
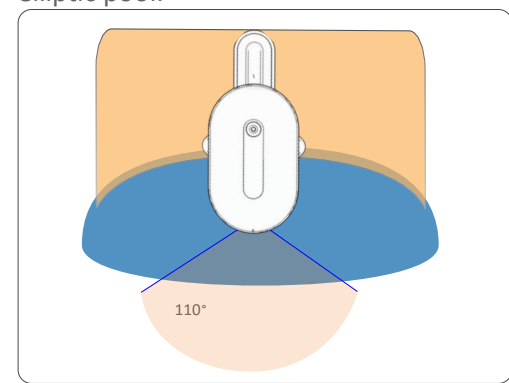

B. corner of a rectangular pool.
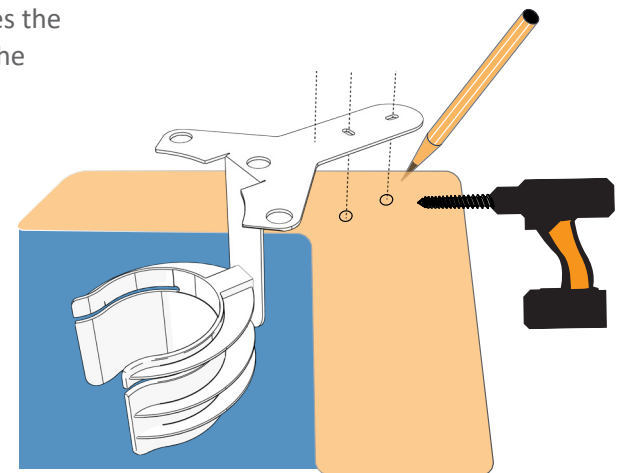

C. Corner of a rectangular pool (rotated).

- For different pool shapes, please refer to the recommendations provided in the user manual.
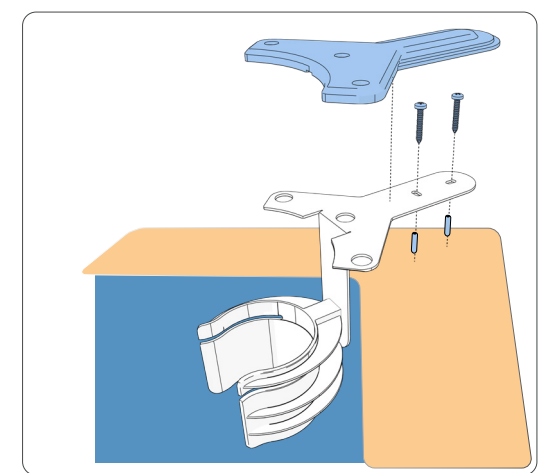

4 Mounting Docking Station

A. Verify that the metal vertical part of the docking station touches the inner wall of the pool.

B. Mark the location of the screws.

**C.** Drill 2x 8mm (⁵⁄₁₆") holes.

D. Mount the docking station using screws and anchors found in the accessories pack and attach the base plate cover.
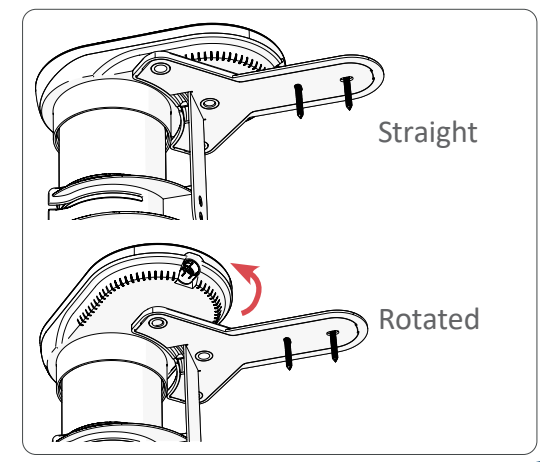

E. Insert the pool unit into the docking station.

F. Water level must reach the water level mark on the tube.

**G.** Insert the pool unit pin according to straight or rotated docking position.

Straight

Rotated

5 Installing MYLO

Insert the power cord into the pool unit and plug the other end into a water protected power outlet.
